CASE STUDY | SEO

Regional Education Business

Established a technical SEO baseline, rebuilt site architecture around search intent clusters, and connected content pages to conversion-ready admission pathways with clear proof and CTA hierarchy.

187% GROWTH IN QUALIFIED ORGANIC LEADS

ENGAGEMENT TIMELINE: 6 MONTHS

CATEGORY
SEO

TIMELINE
6 months

HEADLINE RESULT
187%

Objective

Turn organic search into a predictable lead channel for program admissions, reducing overdependence on paid enquiries.

Engagement Scope

- Search Engine Optimization Services
- Website Design and Website Development
- Graphic Designing for Marketing

Approach

- Resolved technical SEO blockers across indexing, internal links, metadata consistency, and schema coverage.
- Built keyword clusters by admission intent and mapped each cluster to dedicated conversion paths.
- Connected editorial planning to funnel stages so content discovery flows into enquiry-ready pages.

Execution Timeline

Phase 1: Technical Foundation
MONTH 1
Crawl cleanup, information architecture adjustments, indexation and metadata baseline.

Phase 2: Intent Cluster Buildout
MONTHS 2-4
Program-specific keyword clusters, page optimization, and structured internal linking.

Phase 3: Conversion Integration
MONTHS 5-6
Trust-led content updates, form flow optimization, and ranking-to-lead performance tracking.

Before

- Core pages were not optimized for intent-heavy admission and program queries.
- Content production was ad hoc, without cluster ownership or funnel mapping.
- Lead pages lacked schema, trust elements, and a clear enquiry progression.

After

- 31 high-intent keywords moved into top-10 positions across target programs.
- Qualified organic enquiries increased by 187% over the engagement period.
- Organic channel became a reliable lead source with lower paid dependency.

Business Impact

- Admission pipeline became less volatile due to stronger inbound demand from search.
- Cost of acquiring qualified enquiries improved through reduced paid-channel pressure.
- Academic and marketing teams gained a shared search-intent framework for future campaigns.
