TIMELINE

14 weeks

HEADLINE RESULT

61%

Objective

Reduce qualified lead cost while increasing sales-ready pipeline quality through aligned marketing and sales decision systems.

Engagement Scope

- Google Ads and Meta Ads Management
- Search Engine Optimization Services
- Workflow Automation and Reporting Systems
- Website Design and Website Development

Approach

- Established a shared MQL definition with sales and reflected it in campaign optimization rules.
- Rebuilt tracking and reporting to separate channel vanity metrics from pipeline-contributing outcomes.
- Shifted media investment toward high-intent keywords, remarketing, and pre-qualification landing journeys.
- Added workflow automation for lead routing and follow-up visibility so qualified enquiries reached sales faster.

Execution Timeline

Phase 1: Qualification Alignment

WEEKS 1-2

MQL criteria definition, CRM handoff logic, and baseline funnel diagnostics.

Phase 2: Attribution and Channel Rebuild

WEEKS 3-7

Tracking corrections, campaign restructuring, and landing page pre-qualification updates.

Phase 3: Pipeline-Led Optimization

WEEKS 8-14

Weekly budget governance based on attributable pipeline and meeting conversion rates.

Before

- Marketing and sales used different definitions of lead quality and readiness.
- Attribution gaps made budget shifts reactive and channel comparisons unreliable.
- Landing experiences were generic and did not pre-qualify enterprise-fit leads.
- Lead handoff delays created avoidable leakage between form fill and first sales contact.

After

- Shared MQL criteria and lead scoring were integrated into weekly reporting.
- Budget was reallocated to campaigns mapped to attributable pipeline value.
- Blended qualified CPL reduced by 61% while meeting-booking rates improved.
- Lead routing and follow-up visibility improved the speed and consistency of sales response.

Business Impact

- Sales confidence in marketing-sourced leads increased due to stronger qualification discipline.
- Budget efficiency improved by shifting spend toward campaigns with measurable pipeline contribution.
- Leadership gained clearer forecasting inputs from a cleaner lead-to-meeting funnel.
- The commercial team gained one operating view across demand generation, lead qualification, and first-response execution.
