

CASE STUDY | PR

Boutique Hospitality Group

Fernesta rebuilt the group's launch communications around a tighter social content calendar, creator seeding plan, landing page refinements, and PR outreach sequence so awareness translated into measurable enquiry growth.

3.6x INCREASE IN QUALIFIED EVENT ENQUIRIES

ENGAGEMENT TIMELINE: 16 WEEKS

CATEGORY

PR

TIMELINE

16 weeks

HEADLINE RESULT

3.6x

Objective

Increase event and staycation enquiries by coordinating social media, influencer activity, PR timing, and conversion-ready landing experiences under one launch playbook.

Engagement Scope

- Social Media Management Services
- PR and Influencer Management
- Creative Design for Performance Marketing
- Website Design and Website Development

Approach

- Built a weekly social content and distribution calendar tied to launch milestones, offer windows, and enquiry targets.
- Created creator shortlists, briefing templates, and posting windows so influencer output landed around booking-intent peaks.
- Reworked landing page sections, proof blocks, and response flows so campaign traffic encountered clearer conversion pathways.
- Introduced performance reporting that separated vanity reach from creator-assisted enquiries and assisted booking signals.

Execution Timeline

Phase 1: Narrative and Offer Structuring

WEEKS 1-3

Offer framing, message hierarchy, content pillars, and creator brief design.

Phase 2: Social and Creator Rollout

WEEKS 4-8

Content deployment, creator posts, PR outreach, and landing page response alignment.

Phase 3: Signal Optimization

WEEKS 9-12

Audience response review, content iteration, and enquiry source-quality filtering.

Phase 4: Scale and Reputation Reinforcement

WEEKS 13-16

High-performing format expansion, creator relationship retention, and press-proof amplification.

Before

- Social posting was inconsistent and not sequenced against offer windows or launch milestones.
- Creator partnerships were ad hoc, with limited briefing rigor and unclear expectations on output.
- Press mentions and influencer activity were not tied back to enquiry generation or landing performance.
- Landing pages did not convert launch traffic efficiently because proof and next-step structure were too weak.

After

- The launch calendar aligned social, PR, and influencer activity to commercially important booking moments.
- Creator posts were briefed and timed against clear enquiry goals instead of generic visibility output.
- Landing page refinements improved traffic-to-enquiry conversion across launch periods.
- Qualified event enquiries grew 3.6x while brand visibility became easier to attribute and govern.

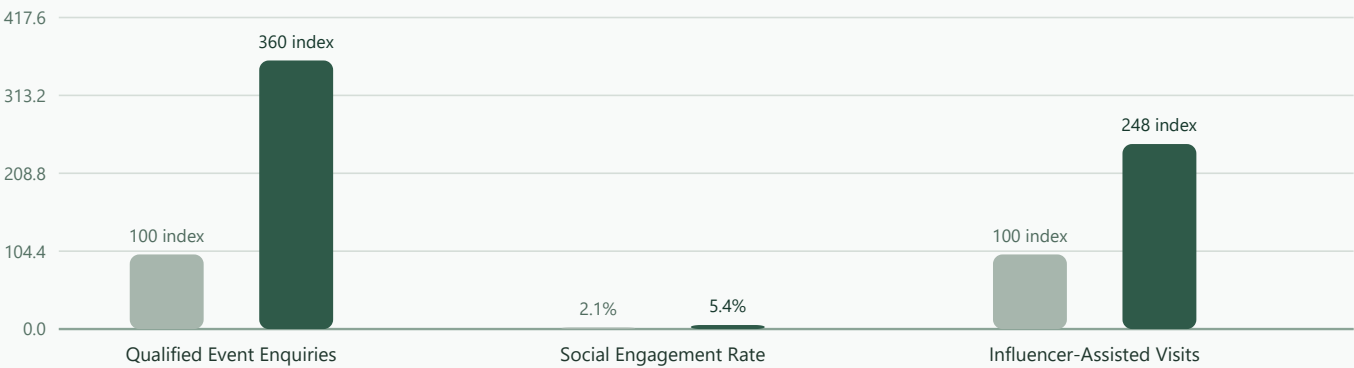

Business Impact

- The business gained a reusable launch playbook spanning content, creators, PR, and conversion surfaces.
- Management could see which awareness efforts were assisting qualified booking demand instead of only reach.
- Social and PR work shifted from isolated tactics to a governed commercial communications system.

- The team retained a stronger creator and PR operating base for future seasonal campaigns.
