TIMELINE

5 months

HEADLINE RESULT

42%

Objective

Improve retention-led growth by fixing fragmented brand communication and building lifecycle pathways for repeat purchase.

Engagement Scope

- Branding and Business Profiling
- Social Media Management Services
- Workflow Automation and Reporting Systems
- Creative Design for Performance Marketing

Approach

- Defined a unified brand voice and visual system across social, campaign, and CRM touchpoints.
- Segmented customers by behavior stage and built lifecycle journeys for onboarding, replenishment, and win-back.
- Aligned campaign content with customer lifetime value goals instead of one-time conversion spikes.
- Introduced workflow automation for retention reporting so repeat-purchase performance stayed visible every week.

Execution Timeline

Phase 1: Brand Alignment

WEEKS 1-4

Positioning reset, creative direction, and consistency standards across channels.

Phase 2: Lifecycle Architecture

WEEKS 5-10

Audience segmentation, message sequencing, and retention automation setup.

Phase 3: Retention Optimization

WEEKS 11-20

Journey performance monitoring, message refinement, and repeat-purchase uplift testing.

Before

- Visual identity and voice varied across social, ads, and email touchpoints.
- Post-purchase communication was generic and did not reflect lifecycle timing.
- Campaigns were acquisition-heavy with no strong repeat-purchase mechanism.
- Retention reporting was too manual to support fast iteration across journeys.

After

- Unified brand narrative and design system across all customer-facing channels.
- Lifecycle flows were deployed for onboarding, replenishment, and win-back windows.
- Returning customer rate increased by 42%, improving retention-led revenue share.
- Retention decisions became easier because journey performance and drop-offs were visible in one reporting rhythm.

Business Impact

- Revenue mix shifted toward repeat customers, improving predictability month over month.
- Customer lifetime value trajectory strengthened as lifecycle engagement depth improved.
- Brand consistency reduced friction between acquisition campaigns and post-purchase experience.
- Leadership gained better visibility into how lifecycle automation affected repeat revenue performance.
