TIMELINE

6 months

HEADLINE RESULT

187%

## Objective

Turn organic search into a predictable lead channel for program admissions, reducing overdependence on paid enquiries.

## Engagement Scope

- Search Engine Optimization Services
- Website Design and Website Development
- Creative Design for Performance Marketing

## Approach

- Resolved technical SEO blockers across indexing, internal links, metadata consistency, and schema coverage.
- Built keyword clusters by admission intent and mapped each cluster to dedicated conversion paths.
- Connected editorial planning to funnel stages so content discovery flows into enquiry-ready pages.
- Refined page layouts and proof sections so ranking gains translated into stronger enquiry conversion quality.

## Execution Timeline

### Phase 1: Technical Foundation

MONTH 1

Crawl cleanup, information architecture adjustments, indexing and metadata baseline.

### Phase 2: Intent Cluster Buildout

MONTHS 2-4

Program-specific keyword clusters, page optimization, and structured internal linking.

### Phase 3: Conversion Integration

MONTHS 5-6

Trust-led content updates, form flow optimization, and ranking-to-lead performance tracking.

## Before

- Core pages were not optimized for intent-heavy admission and program queries.
- Content production was ad hoc, without cluster ownership or funnel mapping.
- Lead pages lacked schema, trust elements, and a clear enquiry progression.
- Organic reporting focused on sessions, not whether rankings were contributing to qualified enquiries.

## After

- 31 high-intent keywords moved into top-10 positions across target programs.
- Qualified organic enquiries increased by 187% over the engagement period.
- Organic channel became a reliable lead source with lower paid dependency.
- SEO reporting connected ranking movement to page-level enquiry contribution and admission funnel health.

## Business Impact

- Admission pipeline became less volatile due to stronger inbound demand from search.
- Cost of acquiring qualified enquiries improved through reduced paid-channel pressure.
- Academic and marketing teams gained a shared search-intent framework for future campaigns.
- The business gained a repeatable SEO system instead of one-off optimization bursts.
